

Listing of Claims:

This listing of claims reflects all claim amendments and replaces all prior versions, and listings, of claims in the application. Material to be inserted is in underline, and material to be deleted is in ~~strikeout~~ or (if the deletion is of five or fewer consecutive characters or would be difficult to see) in double brackets [[]]. Any cancellations are without prejudice.

1. (Currently amended) A device for converting UMTS-FDD signals into WLAN signals, comprising:

a receiver unit for receiving the UMTS-FDD signals;[[,]]

means for converting the signals received into WLAN signals; and as well as

means for providing or transmitting the WLAN signals.

2. (Currently amended) The device as claimed in claim 1, ~~characterized in that there are furthermore provided~~ further comprising:

means for converting the UMTS signals received into signals according to a telephone standard; and as well as

means for providing or transmitting the signals according to [[a]]the telephone standard.

3. (Currently amended) A device for converting UMTS signals into signals according to a telephone standard, comprising:

a receiver unit for receiving the UMTS signals;[[,]]

means for converting the signals received into signals according to a telephone standard; and as well as

means for providing or transmitting the signals according to [[a]]the telephone standard.

4. (Currently amended) The device as claimed in claim 3, ~~characterized in that there~~
~~are furthermore provided~~further comprising:

means for converting the signals received into WLAN signals; ~~as well as~~and
means for providing or transmitting the WLAN signals.

5. (Currently amended) The device as claimed in ~~any of claim[[s]] 1, 2 or 4,~~
~~characterized in that~~ wherein the means for providing or transmitting the WLAN signals
comprises a slot ~~as well as~~and a plug-in WLAN card to be inserted into the same, by means of
which signals according to the WLAN standard are generated.

6. (Currently amended) The device as claimed in ~~any of claims 2 to 4,~~
~~characterized in that~~ wherein the means for providing or transmitting signals according to
[[a]]the telephone standard comprises a connecting unit for a telephone system or a fax machine.

7. (Currently amended) The device as claimed in ~~any of the preceding~~ claim[[s]]1,
~~characterized in that~~ wherein the UMTS-FDD signals or the UMTS signals comprise Internet
data.

8. (Currently amended) The device as claimed in ~~any of the preceding~~ claim[[s]]1,
~~characterized in that~~ wherein the UMTS-FDD signals or the UMTS signals comprise voice data.

9. (Currently amended) The device as claimed in claim 8, ~~characterized in that wherein~~ the voice data comprise voice messages and fax messages.

10. (Currently amended) A communication system comprising:
a device for converting UMTS signals into signals according to a telephone standard, comprising: a receiver unit for receiving the UMTS signals; means for converting the signals received into signals according to a telephone standard; and means for providing or transmitting the signals according to the telephone standard~~a device as claimed in any of claims 1 to 9 as well as and: comprising~~

~~at least one computer and/or telephone system and/or fax machine connected with the device.~~

11. (Currently amended) The communication system as claimed in claim 10, ~~characterized in that wherein the at least one computer[[s are]] is connectable by means of the device both with each other and with the Internet.~~

12. (Currently amended) The communication system as claimed in claim 10~~or 11~~, ~~characterized in that wherein the at least one telephone system or [[the]]fax machine communicates with the device via a cord-connected line.~~

13. (Currently amended) The communication system as claimed in ~~any of claim[[s]] 10 to 12, characterized in that wherein~~ the device communicates with a transceiver unit for

telephone or fax data and ~~that~~ the transceiver unit has a cordless connection with the telephone system or the fax machine.

14. (New) The device as claimed in claim 1 wherein the means for providing or transmitting the WLAN signals comprises a slot and a plug-in WLAN card to be inserted into the same, by means of which signals according to the WLAN standard are generated.
